

Help us stop the spread of the flu virus.

WVU Hospitals-East, City Hospital and Jefferson Memorial Hospital, strongly urge you to follow these simple visitor guidelines during this year's flu season:

- Visitors with a fever, cough, chills, muscle aches or other symptoms of infection should NOT visit the hospital.
- Only visitors 18 years of age or older should visit friends or loved ones who are patients in the hospital. Please encourage those 18 years and younger to remain at home.
- Only 2 visitors per patient at one time.

**Help protect our patients and your family
from the flu by complying with these
important infection control measures.**

Thank you for your cooperation!

Please understand that we may need to implement mandatory restrictions in the future as flu season progresses.
